

Environmental statement

Kuehne + Nagel is committed to offering environmentally friendly, sustainable and innovative supply chain solutions. At the center of our environmental programme is to achieve growth in ways that minimize or eliminate pollution and other negative environmental impacts, and whenever possible replenish, restore and nourish the world we live in.

Our ultimate goal is: **Protect the Environment for Next Generations**

Key elements from our programme are:

- Environmental Products and Services. Providing environmentally sensitive products.
- Carbon Management – moving towards carbon neutrality through our Net Zero Carbon Programme. Maintaining CO2 visibility in the supply chain, crucial for reduction and offsetting.
- Compliance with Legal Requirements. Identifying and ensuring full compliance with legislation and regulations.
- Supplier Environmental Performance. Designing criteria to procure logistics services aligned with our environmental programmes.
- Performance Evaluation. Defining key performance indicators and measuring compliance with environmental objectives, towards continuous improvement.
- ISO 14001. Utilize certification to ISO 14001 as a platform for development, documentation, implementation, and maintenance of processes, practices and procedures related to our Environmental Management System.

Our Focus Areas include:

- Energy: efficient use of energy and increased sourcing from renewable alternatives.
- Water: efficient and responsible use of water in our operations and protection of clean water sources from any hazardous material handled or transported.
- Waste: reduce sources of waste, find opportunities to reuse, recycle and recover to avoid or minimize landfill waste.
- Our Team: just as the vitality of a system depends on relationships, we use the diversity of a global company and community to convert geographical separation in strengths to generate ideas about how to improve our interaction with the Environment.

To accomplish our environmental goals and targets our company subscribed and committed to the UN Global Compact Principles and the UN Sustainable Development Goals..
