

Healthcare

**For when it
matters the most**

The right shipment solution for when it matters the most

Your key benefits

Dedication to quality and service

Because your products require the utmost care during transportation and storage, we use our innovative technology and certified network to provide dedicated end-to-end solutions, so that you can focus on what matters most.

Meeting every requirement

Regardless of the compliance level required, our attention to detail will allow you to focus on what is important. We leverage our global network and local knowledge to ensure full compliance with industry regulations, global guidelines and local legislation.

Flexible end-to-end solutions

Our globally standardised systems and specific service offerings ensure that we always meet your exact requirements. Select the right service for each shipment based on the needs of your product.

24/7 control and rapid intervention

Do your shipments require special care? Our certified pharma and healthcare experts will meticulously monitor your products and proactively intervene to correct any deviations.

Pioneering risk management

Our integrated approach to risk management ensures the optimal handling of your products throughout the entire supply chain, regardless of transportation mode or storage conditions.

About us

With approximately 81,000 employees at almost 1,300 sites in close to 100 countries, the Kuehne+Nagel Group is one of the world's leading logistics providers. Headquartered in Switzerland, Kuehne+Nagel is listed in the Swiss blue-chip stock market index, the SMI. The Group is the global number one in air and sea logistics and has strong market positions in road and contract logistics.

Kuehne+Nagel is the logistics partner of choice for 400,000 customers worldwide. Using its global network, logistics expertise and data-based insights, the Group provides end-to-end supply chain solutions for global companies and industries. As a member of the Science Based Target Initiative (SBTi), Kuehne+Nagel is committed to sustainable logistics by reducing its own environmental footprint and by supporting its customers with low-carbon logistics solutions.
