

Safety & Health Statement

At Kuehne + Nagel, we are committed to maintaining a safe and healthy working environment for our employees, partners, customers, and the communities in which we operate.

Our ultimate goal is

NO HARM TO PEOPLE.

To help achieve our goal we maintain a Safety & Health Management System that is supported by a global, regional and national QSHE team. We provide awareness and training to our employees to ensure that they are able to carry out their jobs safely and effectively.

We keep our global operations certified and compliant with local and national regulations and other relevant standards like OHSAS 18001 and ISO 45001. We identify potential hazards in our operations, assess the level of risk, and find ways of eliminating or mitigating them. Management at all levels is required to follow up the identified improvements. To quickly recover from an undesired event, Emergency Response, Crisis Management and Business Continuity plans are in place, and regularly tested and reviewed for continuous improvement.

Subcontractors and other third parties needed for our business, are assessed, selected and managed in line with the objectives of this statement.

To ensure continuous improvement, we rigorously monitor our Safety and Health KPIs, investigate incidents, analyse safety data, and regularly review the follow-up of our QSHE targets and objectives. Where needed, we conduct safety campaigns and programs to achieve our targets.

We require all employees and suppliers to adhere to all compliance obligations, relevant regulations, rules, work instructions and safety measures at all times.

Our employees are urged to STOP potentially unsafe activities immediately, and to report unsafe situations to their supervisor.

Dr. Detlef Trefzger, CEO
